Portofolio: [Link_portofolio](#) | Yogyakarta

A Bachelor's degree student in Information Systems at Duta Wacana Christian University, currently seeking opportunities in Programming and UI/UX Design. Having organizational experience within the study program as part of the student association (Hima) and various committees has shaped me into a responsible individual who can plan and manage time effectively. I enjoy challenges and learning new things, with a strong interest in the field of technology. I am also actively developing my skills, particularly in coding and interface design.

EDUCATION

Universitas Kristen Duta Wacana	Yogyakarta, Indonesia
Fakultas Teknologi Informasi – Sistem Informasi	(2021-2025)
- Undergraduate in Information Systems - IPK: 3.24/4.00	
SMA Kristen Bentara Wacana (2018-2021)	Muntilan, Indonesia
Jurusan Mipa	(2018-2021)
- Average Grade: 85.07 - Achieved 3rd place for consecutive terms	

ORGANIZATION EXPERIENCE

Himpunan Mahasiswa Sistem Informasi (HMSI)	2021/2022 and 2022/2023
<i>Member of the Design and Documentation Division</i>	
- Created designs for organizational needs such as social media content on Instagram and Facebook, as well as mockups for the Creative Economy Division (Ekraf), considering concepts and current trends. - Documented organizational activities, including monthly meetings and gathering events, through photography.	

PROJECTS

UI/UX Design for an Event Committee Recruitment Information System
- The system was designed for four roles: admin, organization executive board, committee leader, and applicant (student). - Designed the user interface and prototype for activity management and recruitment implementation.
UI/UX Design for a Game Streaming and Tournament Platform Landing Page
Created a login page and user interface for the home page.
Management Projects ERP System
Built a website featuring a landing page, management system, financial and project reports, visualization dashboard, and performance monitoring system.
Social Assistance Management Information System
Developed a website for social assistance management, consisting of a dashboard, social assistance management module, and beneficiary data recap.
